| Notes to the Annual Financial Statements | 28 - 54 |

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the director to ensure that the annual financial statements fairly present the state of affairs of the entity as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

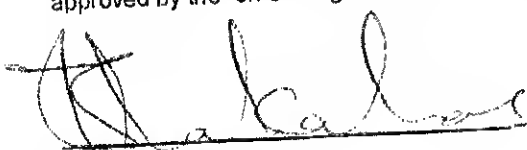

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the entity and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the entity and all employees are required to maintain the highest ethical standards in ensuring the entity's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the entity is on identifying, assessing, managing and monitoring all known forms of risk across the entity. While operating risk cannot be fully eliminated, the entity endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the entity's cash flow forecast for the year to 30 June 2017 end, in the light of this review and the current financial position, he is satisfied that the entity has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the entity's annual financial statements.

The annual financial statements set out on pages 5 to 54, which have been prepared on the going concern basis, were approved by the on 31 August 2016 and were signed by him:

T Phakalane
Accounting officer

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Officer's Report

The accounting officer submits his report for the year ended 30 June 2016.

1. Review of activities

Main business and operations

The municipality main business is the provision of services to the community in line with Part B of Schedule 4 and Part B of Schedule 5 of the Constitution. The municipality provides services in Zeerust, Lehurutse and Groot Marico.

Net surplus of the entity is R 32 155 263 (2015: deficit R 30 858 256).

2. Going concern

The annual financial statements have been prepared on the going concern basis. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Subsequent events

The accounting officer reported the following;

1. New council was selected on the 6th of August 2016
2. A dispute regarding the increase in salary due to municipality grading was resolved to pay the employees an increase of 8.4 % starting from July 2016

4. Accounting policies

The annual financial statements have been prepared in accordance with South African Standards of Generally Recognised Accounting Practice and the requirements of the Municipal Finance Management Act 2003 (Act No. 56 of 2003) (MFMA) and the Division of Act South Africa (Act No 2 of 2013) (DoRA).

The annual financial statements are prepared in accordance with the Statements issued by the Accounting Practices Board, and in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) Issued by the Accounting Standards Board as the prescribed framework by National Treasury.

5.

The accounting officer of the entity during the year and to the date of this report is as follows:

| Name | Nationality |
|-------------|---------------|
| T Phakalane | South African |

6. Corporate governance

General

The is committed to business integrity, transparency and professionalism in all its activities. As part of this commitment, the supports the highest standards of corporate governance and the ongoing development of best practice.

Audit and risk committee

In terms of Section 166 of the Municipal Finance Management Act, No 56 of 2003, the municipality, must appoint members of the Audit Committee.

7. Auditors

Auditor General South Africa will continue in office for the next financial period.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

1.1 Going concern assumption

These annual financial statements have been prepared based on the expectation that the entity will continue to operate as a going concern for at least the next 12 months.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements.

These estimates and underlying assumptions are reviewed on an going concern basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period of the revision and future periods if the revision affects both the current and future periods. The nature and reasons of the uncertainty, judgement made and the impact to the amounts presented in the financial statements are disclosed on the notes to the financial statements.

Trade receivables

The entity assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, management makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Allowance for slow moving, damaged and obsolete inventory

The municipality assesses an allowance for inventory to write inventory down to the lower of cost or net realisable value. The write down is recognised in surplus or deficit.

Impairment testing

The recoverable amounts of cash and non-cash generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

The entity reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 19 - Provisions.

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Useful lives and residual values of assets

The entity's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

The municipality reviews residual values of assets to determine if there is a change in the amount that the municipality would obtain from disposal of the asset, after deducting the estimated costs of disposal, if that asset was already of the age and condition expected at the end of its useful life.

Post retirement benefits

The present value of the post employment medical benefits are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long term nature of these plans, such estimates are subject to significant uncertainty. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

1.3 Investment property

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the entity, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

| Item | Useful life |
|----------------------|-------------|
| Property - land | indefinite |
| Property - buildings | 30 years |

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.4 Property, plant and equipment (continued)

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

| Item | Depreciation method | Average useful life |
|-------------------------------------|---------------------|---------------------|
| Land | Straight line | Indefinite |
| Buildings | Straight line | 20 - 100 years |
| Plant and machinery | Straight line | 3 - 10 years |
| Furniture and fixtures | Straight line | 3 - 10 years |
| Motor vehicles | Straight line | 5 - 10 years |
| Office equipment | Straight line | 3 - 10 years |
| Computer equipment | Straight line | 3 - 10 years |
| Infrastructure | Straight line | 20 - 100 years |
| Community | Straight line | 20 - 100 years |
| Other property, plant and equipment | Straight line | 3 - 10 years |
| Roads & Stormwater Assets | Straight line | 20 - 100 years |
| Electricity assets | Straight line | 20 - 100 years |
| Other assets | Straight line | 3 - 10 years |

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Accounting Policies

1.4 Property, plant and equipment (continued)

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the entity holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.5 Site restoration and dismantling cost

The entity has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the entity considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.6 Intangible assets

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the entity; and
- the cost or fair value of the asset can be measured reliably.

The entity assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Accounting Policies

1.6 Intangible assets (continued)

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

| Item | Useful life |
|--------------------------|--------------------|
| Computer software, other | Indefinite |

1.7 Heritage assets

Assets are resources controlled by the entity as a result of past events and from which future economic benefits or service potential are expected to flow to the entity.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an entity's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The entity recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the entity, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Impairment

The entity assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the entity estimates the recoverable amount or the recoverable service amount of the heritage asset.

Derecognition

The entity derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

Transitional provision

The entity changed its accounting policy for heritage assets in 2016. The change in accounting policy is made in accordance with its transitional provision as per Directive 2 of the GRAP Reporting Framework.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.8 Interest in joint venture

An interest in a joint venture is carried .

The entity applies the same accounting for each category of investment.

Surpluses and deficits resulting from contributions or sale of assets to joint ventures are only recognised to the extent of other venturers' interests in the joint venture.

The entity's share of surpluses or deficits, resulting from purchase of assets from joint ventures are recognised only when the assets are resold to an independent party.

In respect of its interest in jointly controlled assets, the entity recognises in its annual financial statements:

- its share of the jointly controlled assets, classified according to the nature of the assets;
- any liabilities that it has incurred;
- its share of any liabilities incurred jointly with the other venturers in relation to the joint venture;
- any revenue from the sale or use of its share of the output of the joint venture, together with its share of any expenses incurred by the joint venture; and
- any expenses that it has incurred in respect of its interest in the joint venture.

The entity recognises a dividend or similar distribution in surplus or deficit in its separate annual financial statements when its right to receive the dividend or similar distribution is established.

1.9 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.9 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Cash and cash equivalents

These are initially and subsequently recorded at fair value. For cash flow purposes, cash and cash equivalents include cash on hand, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less, and bank overdrafts. These are subject to an insignificant risk of changes in value.

Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. Impairment loss is recognised against an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed against allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.9 Financial instruments (continued)

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Distributions to holders of residual interests are recognised by the entity directly in net assets. Transaction costs incurred on residual interests are accounted for as a deduction from net assets. Income tax [where applicable] relating to distributions to holders of residual interests and to transaction costs incurred on residual interests are accounted for in accordance with the International Accounting Standard on Income Taxes.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

1.10 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Finance leases - lessee

The municipality leases certain property, plant and equipment. Leases of property, plant and equipment where the municipality assumes substantially all the risks and rewards of ownership are classified as finance leases. Finance lease assets and liabilities are recognised at the inception of the lease at the lower of the fair value of the leased assets and the present value of the future minimum lease payments.

Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges are included in other long term payables. The interest element of the finance cost is charged to the Statement of Financial Performance over the lease periods so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases are depreciated over their shorter of the useful life of the asset and the lease term. The municipality will not incur a foreign currency lease liability other than that allowed by the MFMA Act (Act 56 of 2003)

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Accounting Policies

1.11 Inventories

Inventories are initially measured at weighted average cost, except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the entity incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the entity.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Unsold properties are measured at the lower of cost and net realisable value. Cost is primarily determined by reference to the Valuation Roll or total cost of servicing the land such as direct costs and portion of overhead costs that relates to the development.

1.12 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the entity; or

Accounting Policies

1.12 Impairment of cash-generating assets (continued)

- (b) the number of production or similar units expected to be obtained from the asset by the entity.

Criteria developed by the entity to distinguish cash-generating assets from non-cash-generating assets are as follow:

1.13 Impairment of non-cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the entity; or
(b) the number of production or similar units expected to be obtained from the asset by the entity.

Criteria developed by the entity to distinguish non-cash-generating assets from cash-generating assets are as follow: [Specify criteria]

1.14 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Defined contribution plans

The municipality and its employees contribute to various pension, provident and retirement funds and its Councillors contribute to the Pension Fund for Municipal Councillors. The retirement benefit are calculated in accordance with the rules of the funds. Full actuarial valuations are performed by the relevant funds on a regular basis as per the requirements of the various funds. Current contributions are recognised in surplus or deficit in the period in which the service is rendered by the relevant employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

Accounting Policies

1.14 Employee benefits (continued)

Defined benefit plans

The municipality provides certain post retirement medical benefits by funding the medical aid contributions for retired members of the municipality. According to the rules of the medical aid fund associated with the municipality, when a member who joined the municipality under the current conditions of service retires, she/he is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. These funds are classified as defined benefit plans. The cost of providing the benefits is determined using the projected unit credit method prescribed by IAS 19. Future benefit values are projected using specific assumptions, and the liability for in service members is accrued over the expected lifetime. No plan assets exist and any actuarial gains or losses are recognised immediately.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Current Service Costs and Interest Costs are recognised as a period expense in the statement of financial performance and is matched to the benefit received during the working life of the employee. The current service costs include the expense for the benefits received by the employee currently in service and the cost of funding the employee when no longer in service. The expense for the year is included in the employee benefit expense in the statement of financial performance.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan are recognised when the entity is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

Other long term employee benefits

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the municipality.

The municipality's net obligation in respect of long service awards is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value.

1.15 Provisions and contingencies

Provisions are recognised when:

- the entity has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Accounting Policies

1.15 Provisions and contingencies (continued)

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 38.

Illegal Dumping: The municipality has an obligation to rehabilitate any contaminated land through illegal dumping. A provision has been established and recognised at the present value of the expenditure expected to settle the obligation and is carried at amortised cost.

Landfill sites: The municipality has an obligation to rehabilitate its landfill sites in terms of its licencing stipulations. A provision has been established from 2008/9. The amount of the provision is recognised at the present value of the expenditure expected to settle the obligations and is carried at amortised cost.

1.16 Revenue from exchange transactions

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the entity has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the entity;
- and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.16 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the entity;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Service charges relating to electricity, water and sanitation are based on consumption. Meters are read and billed on a monthly basis and revenue is recognised when invoiced. Estimated consumptions are made monthly when meters have not been read. The estimates of consumption are recognised as revenue when invoiced. Adjustments to estimates of consumption are made in the invoicing period when meters have been read. These adjustments are recognised as revenue in the invoicing period.

Income from agency services: Income from agency services is recognised on a monthly basis once the income collected/received on behalf of agents has been quantified. The income is recognised in terms of the agency agreement.

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the entity, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Dividends or similar distributions are recognised, in surplus or deficit, when the entity's right to receive payment has been established.

1.17 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an entity, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arises when the entity can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.17 Revenue from non-exchange transactions (continued)

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an entity either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting entity.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Unconditional grants and receipts

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

The municipality assesses the degree of certainty attached to the flow of future economic benefits or service potential on the basis of the available evidence. Certain grants payable by one level of government to another are subject to the availability of funds. Revenue from these grants is only recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the entity. An announcement at the beginning of a financial year that grants may be available for qualifying entities in accordance with an agreed programme may not be sufficient evidence of the probability of the flow. Revenue is then only recognised once evidence of the probability of the flow becomes available, which in most cases is on receipt.

Restrictions on government grants may result in such revenue being recognised on a time proportion basis. Where there is no restriction on the period, such revenue is recognised on receipt or when the Act becomes effective, whichever is earlier.

When government remit grants on a re-imbursement basis, revenue is recognised when the qualifying expense has been incurred and to the extent that any other restrictions have been complied with.

1.18 Value Added Tax

The municipality accounts for Value Added Tax (VAT) on a cash basis. The municipality is liable to account for VAT at the standard rate of 14% in terms of section 7(1)(a) of the VAT Act in respect of supply of goods or services, except where the supplies are specifically zero-rated in terms of section 11, exempted in terms of section 12 of the VAT Act or are scoped out for VAT purposes. The municipality accounts for VAT on a monthly basis.

1.19 Pre-paid electricity

Revenue from the sale of electricity using pre-paid meter cards is recognised based on consumption.

The related cost of providing services recognised as revenue in the current period is included in cost of sales.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.20 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.21 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

1.22 Comparative figures

When the presentation or classification of items in the financial statements is amended, prior period comparative amounts are reclassified. The nature and reasons for the reclassification is disclosed

Where accounting errors have been identified in the current financial year, the correction is made retrospectively as far as it is practical and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as it is practical and the prior year comparatives are restated accordingly.

1.23 Unauthorised expenditure

Unauthorised expenditure means:

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 Irregular expenditure

Irregular expenditure as defined in section 1 of the MFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the Municipal Systems Act, (Act No. 32 of 2000), Public Office Bearers Act (Act No. 20 of 1998) or any regulations made in terms of these Acts; or; or
- (c) the municipality's Supply Chain Management Policies or any provincial legislation/guidelines providing for procurement procedures in the municipalities.

Irregular expenditure is accounted for as an expense in the statement of financial performance in the period it occurred and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Accounting Policies

1.26 Related parties

The entity operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the local sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the entity, including those charged with the governance of the entity in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the entity.

1.27 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The entity will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The entity will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

The municipality entered into a joint arrangement with ABSA Bank for the construction of a building for leasing purposes. The terms of the arrangement were as follows:

- The municipality contributed a piece of land, which was valued at R700,000 whilst ABSA contributed R6,300,000 for the construction of building.
- The municipality's contribution was deemed to be worth 10% and ABSA 90%.
- On completion of the building, ABSA occupied the building and leased additional rental space.
- Building operating costs are deducted from the rental income.
- ABSA is responsible for management of the building and in return compensated with 5% of rental income plus a management fee which will be agreed between the parties.
- The residue is shared in terms of the venturers' contribution

In terms of GRAP 8 (Interest in Joint Ventures), the municipality's component/share of the building was recognised as Investment property. The nature of this jointly controlled asset is investment property as it is leased to tenants and the municipality earns rentals from it.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Ramotshere Moiloa Local Municipality
Annual Financial Statements for the year ended 30 June 2016

Notes to the Annual Financial Statements

| | 2016 R | 2015 R |
|------------------------|------------------|------------------|
| 15. VAT payable | | |
| Net balance | 5 591 483 | 7 503 979 |
| Vat Returns | (1 320 807) | 218 004 |
| VAT Input Deferred | (5 253 878) | - |
| VAT Control | 10 990 289 | 7 285 974 |
| VAT Output Deferred | 1 175 880 | - |
| | 5 591 484 | 7 503 978 |

The municipality is registered for VAT on a payment basis.

15. Consumer deposits

| | | |
|-------------|------------------|------------------|
| Electricity | 1 257 631 | 1 202 361 |
| Water | 418 424 | 154 674 |
| | 1 676 055 | 1 357 035 |

17. Employee benefit obligations

Defined contribution plan

The municipality has a policy to subsidise post-employment health care costs of employees that belonged to medical scheme on their retirement. The subsidy covers the employee as well as the spouse or dependent.

The amounts recognised in the statement of financial position are as follows:

| | | |
|---|---------------------|---------------------|
| Carrying value | 40 294 000 | 35 475 000 |
| Present value of the defined benefit obligation-wholly unfunded | | |
| | (39 349 000) | (34 659 000) |
| Non-current liabilities | (945 000) | (816 000) |
| Current liabilities | (40 294 000) | (35 475 000) |

The municipality has no further obligation to cover unfunded benefits.

Net expense recognised in the statement of financial performance

| | | |
|--------------------------|------------------|------------------|
| Current service cost | 2 374 000 | 1 777 000 |
| Interest cost | 3 410 000 | 2 885 000 |
| Actuarial (gains) losses | (183 000) | 2 274 000 |
| Settlement | (782 000) | (741 000) |
| | 4 819 000 | 5 995 000 |

Key assumptions used

Assumptions used at the reporting date:

| | | |
|-----------------------------|--------|--------|
| Discount rates used | 9,70 % | 9,40 % |
| Consumer price inflation | 7,84 % | 7,53 % |
| Medical aid inflation | 8,84 % | 8,53 % |
| Net effective discount rate | 1,70 % | 0,80 % |

For the current year and the prior year assumptions, the valuers have taken a point on the yield matching the implied duration of liability.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Notes to the Annual Financial Statements

| | 2016 R | 2015 R |
|--|-----------|-----------|
|--|-----------|-----------|

17. Employee benefit obligations (continued)

Other assumptions

The cost of the subsidy after retirement is dependent on the increase in the contributions to the medical aid scheme before and after retirement. The rate at which these contributions increase will thus have a direct effect on the liability of future retirees.

A one percentage point change in assumed healthcare cost trends rates would have the following effects:

| | One percentage point increase | One percentage point decrease |
|--------------------------------------|-------------------------------------|--|
| Effect on the interest cost | 4 747 000 | 3 382 000 |
| Effect on the service cost | 3 398 000 | 2 139 000 |
| Effect on defined benefit obligation | 47 791 000 | 34 327 000 |

18. Unspent conditional grants and receipts

Unspent conditional grants and receipts comprises of:

Unspent conditional grants and receipts

| | | |
|--------------------------------|------------------|-------------------|
| Municipal Infrastructure Grant | - | 18 805 728 |
| Library Grant | 500 000 | - |
| LGSETA | - | 1 547 230 |
| INEP | - | 1 506 960 |
| Local Government | 1 276 598 | 5 000 000 |
| | 1 776 598 | 26 859 918 |

See note 24 for reconciliation of grants from National/Provincial Government.

| Current liabilities | 480 846 | 953 419 |
| | 20 212 846 | 18 029 419 |

Environmental rehabilitation provision

The provision for rehabilitation of landfill sites relates to the legal obligation to rehabilitate landfill sites to a condition whereby it complies to the permit requirements issued in terms of the Mineral and Petroleum Resources Development Act, (Act, 28 of 2002). The provision was determined by an independent expert as at 30 June 2016 and approximates the discounted expected future cash flows using reasonable estimation techniques.

During the current year, licences for the illegal dumpsites were obtained. The current liability raised as a provision has therefore been moved to non-current as the municipality will rehabilitate the sites when the landfill sites are full.

Long service award

In addition to normal leave an employee shall qualify for the following additional leave as recognition for service at the same employer, which shall be paid out respectively once only the date on which the various periods of continues service have been completed, as follows.

After 10 years service - 10 working days
 After 15 years service - 20 working days
 After 20 years service - 30 working days
 After 25 years service - 30 working days
 After 30 years service - 30 working days
 After 35 years service - 30 working days
 After 40 years service - 30 working days
 After 45 years service - 30 working days.

An employee may choose to either utilise the leave for holiday purposes or en-cash leave within 12 months.

The two most important financial variables used in our valuation are the discount rate and salary inflation. An indication of the uncertainties about the amount or timing of those outflows. Where necessary to provide adequate information, an entity shall disclose the major assumptions made concerning future events.

Discount rate

Ramotshere Moiloa Local Municipality

Notes to the Annual Financial Statements

| | 2016 R | 2015 R |
|---|-------------------|-------------------|
| 19. Provisions (continued) | | |
| IAS19 defines the determination of the Discount rate assumption to be used as the rate that can "be determined by reference to market yields at the balance sheet* date on high quality corporate bonds. In countries where there is no deep market in such bonds, the market yields (at the balance sheet* date) on government bonds should be used. The currency and term of the corporate bonds or government bonds should be consistent with the currency and estimated term of the post-employment benefit obligations."reimbursement. | | |

| Not yet contracted for and authorised by director | - | 10 100 000 |
| | 18 483 731 | 24 830 413 |

This committed expenditure relates to projects and will be financed by available bank facilities, retained surpluses, rights issue of shares, issue of debentures, mortgage facilities, existing cash resources, funds internally generated, etc.

38. Contingencies

39.1 Court Proceedings:

Municipality is being sued for some of the following pending claims. All the claims are being contested based on legal advice. The certainty and the timing of the outflow of these liabilities is uncertain. The amounts disclosed below are possible outflows amounts:

Litigation and claims

| | | |
|--|------------------|------------------|
| RMLS/JS Geldenhuys Trust: Right of use access route and registration of servitude and compensation | - | 1 189 550 |
| Legal fees | 669 838 | - |
| Litigation claims | 481 862 | 8 237 853 |
| | 1 151 700 | 9 427 403 |

39. Compensation of Related Parties

Compensation of Key Management Personnel and Councillors is set out in Note 30 and 33 respectively, to the Annual Financial Statements

40. Prior period errors

In terms of GRAP 3 - Accounting policies, Changes in Estimates and Errors all prior period errors should be disclosed in accordance to the standards:

During the current period adjustments were processed for the previous financial periods. The overall difference for 2015 below reflects the adjustments only for 2015 after having adjusted for the 2014 errors.

The correction of the error(s) results in adjustments as follows:

Annual Financial Statements for the year ended 30 June 2016

Notes to the Annual Financial Statements

Figures in Rand

40. Prior period errors (continued)

40.1 Inventory

An RTS amounting to R10,965 was captured in the current year for goods that were returned in the prior year.

Inventory amounting to R10,020 was erroneously recognised at nil.

Land for sale was incorrectly included in the register as an asset of the municipality, however, this property was verified to be occupied and not the property of the municipality.

Statement of financial position

| | | |
|---------------------------|--------------|--------------|
| Inventory | (13 081 982) | (13 081 982) |
| Accumulated surplus | 13 081 982 | 13 081 982 |
| Payables from exchange | 10 965 | - |
| Inventory (Land for sale) | (10 965) | - |
| | - | - |

41.2 Receivables from exchange transactions

Creditors with debit balances were incorrectly recorded as trade creditors in the prior year statements.

Statement of financial position

| | | |
|--|-----------|---|
| Receivables from exchange transactions | 264 049 | - |
| Payables from exchange | (264 049) | - |
| | - | - |

41.3 Cash and cash equivalents

The cash and cash equivalents in the prior year included a balance for a bank account that was closed in 2014. This was corrected in the current year.

Statement of financial position

| | | |
|---------------------------|----------|----------|
| Cash and cash equivalents | (10 598) | (10 598) |
| Accumulated surplus | 10 598 | 10 598 |
| | - | - |

41.4 Consumer Debtors

Debtors in the prior year that had credit balances were erroneously included as Consumer Debtors.

Billing was reversed for accounts that were billed incorrectly in prior years:

Statement of financial position

| | | |
|------------------------|----------|----------|
| Consumer Debtors | 18 952 | (76 844) |
| Accumulated surplus | 76 844 | 76 844 |
| Payables from exchange | (95 796) | - |
| | - | - |

41.5 Property, Plant and Equipment

In the current year some assets that were fully depreciated but still in use were identified and their useful lives were reassessed. Some assets previously not included in the asset register were identified. The following adjustments were made :

| Total | (146 134 284) | - | (146 134 284) |

42. Risk management

Financial risk management

Council has overall responsibility for the establishment and oversight of the entity's risk management framework. The municipality's risk management policies are established to identify and analyse the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits.

The municipality's Finance department provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the municipality through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, fair value interest rate risk and price risk), credit risk, liquidity risk and cash flow interest rate risk.

The Budget and Treasury Office monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity risk. Risk management policies and systems are reviewed regularly to reflect changes to market conditions and the municipality's activities, and compliance with policies and procedures is reviewed by the internal auditors on a continuous basis, and annually by external auditors. The municipality does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports periodically to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function.

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Notes to the Annual Financial Statements

42. Risk management (continued)

Liquidity risk

Liquidity Risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash or another financial asset. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liquidity risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The entity only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board.

Market risk

Interest rate risk

Interest rate risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes. The entity's policy is to minimise interest rate cash flow risk exposures on long-term financing. Longer term borrowings are therefore usually at fixed rates. The entity's exposures to interest rates on financial assets and financial liabilities are detailed below.

At year-end, financial instruments exposed to interest rate risk were as follows:

- Call and notice deposits
- Development Bank of Southern Africa loans

43. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

44. Unauthorised expenditure

| | | |
|-----------------|--------------------|-------------------|
| Current year | 59 018 590 | 90 954 904 |
| Opening balance | 90 954 904 | - |
| | 149 973 494 | 90 954 904 |

In the current year no unauthorised expenditure was condoned. Investigations regarding unauthorised expenditure is still underway therefore, the information required per MFMA s125(2)(d)(i)-(iii) is not available.

Included in current year unauthorised expenditure is the following non cash items not budgeted for so as to avoid budgeting for a loss;

Non-cash based unauthorised expenditure

| | | |
|--------------|----------|-------------------|
| Depreciation | - | 31 600 885 |
| Bad debts | - | 42 841 196 |
| | - | 74 442 081 |

| Amount paid - current year | (16 923 040) | (18 490 850) |
| | 1 581 616 | - |

Ramotshere Moiloa Local Municipality

Annual Financial Statements for the year ended 30 June 2016

Notes to the Annual Financial Statements

47. Additional disclosure in terms of Municipal Finance Management Act (continued)

VAT

| | | |
|-------------|-----------|-----------|
| VAT payable | 5 591 483 | 7 503 979 |
|-------------|-----------|-----------|

All VAT returns have been submitted by the due date throughout the year.

48. Budgeted operating versus actual operating

Revenue

48.1 Service charges accrued were less than the budget, however, an increase from the prior year was realised and therefore, the difference was as a result of the underbudget of the expected revenue.

48.2 Licences and permits income received was above the budgeted because of underbudgeting..

48.3 Miscellaneous other revenue budgeted included revenue expected from sale of pit, however, the sales revenue expected were not reached..

48.4 Interest received was less than budgeted as the invested reduced in the current year therefore resulting in a decrease in interest received.

48.5 Property rates budget exceeded due to implementation of the supplementary valuation roll during the year.

48.6 Government grants and subsidies exceeded budget as they include all operational and capital grants, however, the budgeted amount only included operational grants.

48.7 Fines and penalties received were below the expected amount.

Expenditure

48.8 Employee related costs exceeded budget as a result of settlements paid that were not budgeted for and also because of acting allowances and payment on officials suspended

48.9 Depreciation and amortisation exceeded budget as a result of understatement of budget

48.10 Finance costs were less than budgeted as a result of over budget

48.11 Debt Impairment was not included in the budget.

48.12 Contracted services were below the amount budgeted as a result of overstatement of the budget.

48.13 General expenditure incurred was below budget as a result of cashflow problems.

Capital Expenditure

The budget amount exceeded the expenditure incurred as expected funding was not received.

49. Distribution Losses

Electricity Distribution Losses

| | | |
|------------|------------|------------|
| KWH | 16 422 060 | 17 246 408 |
| | - | - |
| Total loss | 13 471 728 | 12 187 935 |
| | - | - |

The main reason for incurring electricity losses relates to heat dissipation when electricity flows through the conductors, illegal connections, meter tampering and incorrect metering. Cost per KWH R0.8 (2015: R0.708)
